Deployment Tracker Board

Incident Independent Based

Description: This is an internal board used to track where and when a board has been deployed along with tracking associated documentation.

Views: This board provides a single list view for accessing and adding information.

List View - This view lists all the boards and the jurisdictions with checkmarks to indicate if the board is deployed to a specific jurisdiction.

Change Log View—This view enables the review change data entered.

Training - 2017

Change Log

Back

Board: After Actions

Aug 15, 2011 - The version 1.00 have the new NCR standards plus allows only the current user (by username) to edit his own comments. The FFX version is a bot different as the reporters are asked to answer 3 questions.

Nov. 16, 2011 - changed the field labels from Problem to Three Strengths (or Strengths on display) and Recommendations to Areas for Improvement and a Suggestion to Address Each.

Default Features:

- “Back” button to return to the list view.

Variations: None

Last Catalog/Bug Update List View: This view enables an overview look for the board documentation and sharing date details.
