Supported Specialty WebEOC Boards
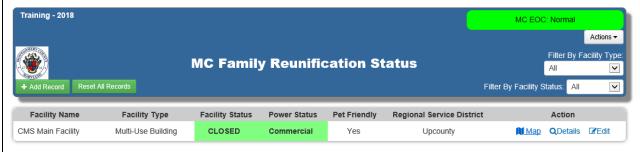

Family Reunification Status Board (Version 1.0)	*Incident Independent*

Description: This board tracks the number, location and overall status of Family Reunification centers.

Views: This board provides one input view to add a shelter and its base information. The board uses board permissions on the list view to determine if the user has the ability to add/edit shelter records or can only view the information.

List view – This view lists the Family Reunification centers and the current status of the center.

Default Features

- Data filtering by facility type or shelter status by selecting from the filter drop down list.
- *Details* link to access additional shelter details
- Status background colors for easy identification of a record's status or power status.
- Mapping capability
- Reset All Records button to change the shelter back to default statuses: status to Closed and the Power Status to Commercial.
- Display of the EOC status in the board header

Variations:None
