# Supported Local Core WebEOC Boards

OEM Policies and Procedures Board	*Incident Independent Based*

Description: This board documents and tracks the Office of Emergency Management's (OEM) policies and procedures.

Views: This board provides two list views: one for accessing and adding information and the other for read only access.

List View - This view lists the documents by name with the associated section category, policy number and effective date. (The view only list does not include the ability to create a new record or make edits.)

Default Features:

- Data displayed in reverse chronological order from when last saved (latest information on top)
- New record creation by clicking the "New Record" button
- Record editing through the "Edit" link
- "Details" link to view the associated document record in a non-editable format
- Color coded section fields to further identify the documents related section
- Print to PDF functionality from the Actions dropdown
- Filtering by the Section field by selecting the desired section
- Search capability on the Section, Policy #, and Policy Name fields

Variation: None

Supported Local Core WebEOC Boards

Input (Edit) View – This view is where document information is created and modified.

Default Features:
- Dropdown field to maintain data consistency
- Date/Time picker code to facilitate proper date format
- "Current Date/Time" button to quickly supply the date field
- "Browse" button to facilitate attaching a document

Variation: None

Details View—This view enables the review of the document information and access to the identified attachment.

Default Features:
- "Return" link to close the window and return to the list view
- Color-coded section to further identify the section

Variations: None
