

NCR Fusion Supported WebEOC Boards

NCR Resource Manager (OEM Resources Inventory)

Incident Independent

Description: The NCR Resource Manager (RM) board enables jurisdictions/users to document their resources. The board guides the user through typing the resource based on its capabilities.

This board also has a component for Asset Inventory that builds off the RM board with additional views for tracking inventory and indicating where it is deployed.

Views: This board offers a list view for inputs/edits to each jurisdiction as well as a read only list. In addition additional list view for Asset Inventory

List View (Resource Manager)- This view lists all resources for the jurisdiction.

The screenshot shows the 'City of Fairfax Resources' page in the NCR WebEOC 2016 system. It features a search bar, filters for 'CAD Deployable' and 'Defined?', and a table of resources. The table has columns for Resource Name, Resource Type, Status, Jurisdiction, and Action.

Resource Name	Resource Type	Status	Jurisdiction	Action
Aerial Apparatus, Fire	1	Available	Fairfax City	Edit Details

Default Features:

- Search capability on the Resource Name, Resource Discipline and the capability choice selections fields for a specified value
- Data filtering by the CAD Deployable flag through the “Filter by” dropdown list options
- Data filtering by whether to display defined, undefined or all resources through the “Filter by” dropdown list options
- Sort capability on any of the displayed fields by clicking on the corresponding column header/field title.
- New record creation by clicking either the “Add Defined Resource” or the “Add Undefined Resource” button
- Record editing through the “Edit” button
- Button to “Details” to view all the resource information in a read only view
- “All Jurisdictions” button to change to the view of all resources shared for viewing throughout the NCR.

Variation: None
