Disable Refresh?

- Tracks the assets and disposable inventory for OEM equipment and supplies
- Tracks deployments, quantities, location, and resource type (if applicable)

FUNCTIONALITY

- Need to manage and maintain equipment on a regular basis but with a mobile application
- All inventory has a barcode and will be built into future versions of the board
- Computers and radios are checked and updated at least monthly
- Tents are checked regularly

A group of people, including men and women, are gathered in a control room. They are wearing safety vests (blue and yellow) and are looking at a computer monitor. The room has multiple monitors and an 'EXIT' sign. The overall scene is dimly lit with a blue tint.
