

# Supported Specialty WebEOC Boards

## Password Manager Board (Version 1.0) Incident Independent

**Description:** This board provides a location to document various website/system user credentials. This board is for internal use by the EOC Manager.

**Views:** This board offers one administrator view that enables the capture of the system name and user credentials.

**List View** - This view lists the system and user credentials for access to the system/site.

The screenshot shows the 'FXC Password Manager' interface. At the top left, it says 'Training - 2015' and 'Print To PDF' is on the right. Below the title, there are buttons for 'New Record', a search input field, and 'Search' and 'Clear' buttons. The main content is a table with the following data:

Website / System Name	Address	Link	Username	Password	Notes	Actions
Google.com	http://www.google.com	<a href="#">Link</a>	afolko098	dfasds45#@	TEST	<input type="button" value="Edit"/>
test	http://www.google.com	<a href="#">Link</a>	test	test123	test	<input type="button" value="Edit"/>

**Default Features:**

- New password credentials record creation through the *New Record* button
- *Edit* button to modify a record.
- *Print to PDF* button to view the information without the buttons and search area in a nice report format.
- Search capability on the Website and Notes fields.

**Variations:** None

**Input (Edit) View** – This view provides an area to record the website/system and the user credentials.

The screenshot shows the 'New Record' form. It has a title bar 'New Record' and buttons for 'Save', 'Spell Check', 'Cancel', and 'Retrieve Record'. The form fields are:

- Website / System Name:
- Website Address:  (Begin with http://)
- Username:
- Password:
- Notes:

**Default Features:**

- Spell Check button to ensure proper spelling.
- Reminder text to include http:// with the website address field

**Variations:** None
