

NCR Fusion Supported WebEOC Boards

NCR Exercise Board

Incident

Independent

This board is provided to enable jurisdictions to simulate posting information during exercises and training as it would be done to the NCR Awareness and Information board for actual events that could have regional impact. There is no direct entry into this board. All entries must go through the controller review process for proper review and proper posting.

Features

This board offers many NCR standard features which include:

- Searching the Subject field for specified text
- Filtering the displayed data by the status value. This is done by selecting the status value from the *Filter By Status* dropdown list of options.
- *Filter by Significance* by selecting the appropriate choice from the dropdown list of options.
- Sorting the data by Last Updated, Event Type, and Status. The sort is activated by clicking on the corresponding column header.

NCR Fusion Supported WebEOC Boards

- Viewing additional details by clicking the *View* button associated with the record.
- Identifying status information by utilizing colored cells for the status. Green indicates the record has been “Closed” and red signifies something is currently “Open” and is currently on-going.
- Priority background colors for easy identification of an event’s priority. Yellow indicates “Critical” and red signifies the event status is “Life Threatening.”
