

NCR Fusion Supported WebEOC Boards

NCR Awareness and Information Board

Incident

Independent

This board provides a mechanism to share information among the NCR jurisdictions. This board is for promoting those items that may have impact on other NCR jurisdictions beyond the originating jurisdiction. There is no direct entry into this board. All entries must go through the controller review process for proper review and proper posting.

Features

This board offers many NCR standard features which include:

- Searching the Subject field for specified text
- Filtering the displayed data by the status value. This is done by selecting the status value from the *Filter By's* dropdown list of options.
- Filter by Significance by selecting the appropriate choice from the drop down list of options.

NCR Fusion Supported WebEOC Boards

- Sorting the data by Last Updated, Event Type, and Status. The sort is activated by clicking on the corresponding column header.
- Viewing additional details by clicking the *View* button associated with the record.
- Identifying status information by utilizing colored cells for the status. Green indicates the record has been “Closed” and red signifies something is currently “Open” and is currently on-going.
- Priority background colors for easy identification of an event’s priority. Yellow indicates “Critical” and red signifies the event status is “Life Threatening.”
