

# NCR Fusion Supported WebEOC Boards

## NCR EOC Status Board *Incident Independent*

This board provides an overall snapshot of the open/closed status of regional Emergency Operations Centers, including information on the address and contact information for the EOC, power status, and key position assignments by name. The locality declaration status is also available with this board. This board is for EOC activation only and not for a departmental activation (DOC).

WMATA	Primary	CLOSED	None		07/09/2014 14:40:37	<a href="#">View</a>	<a href="#">Edit</a>

### Features

This board offers many NCR standard features which include:

- Viewing additional details by clicking the *View* button associated with the record.
- Filtering the displayed data by the status value. This is done by selecting the status value from the *Filter By*'s dropdown list of options.
- Identifying status information by utilizing colored cells for the status. Green means all is good and the EOC has not been opened. Red indicates an open status and additional details may be located within the detail view.
- Editing can be performed by a position/user that has been identified and provided with rights to do so (if the button is not visible to a given user, then that user has not been granted rights to modify the jurisdiction information.). Jurisdictions should only modify their respective data.
