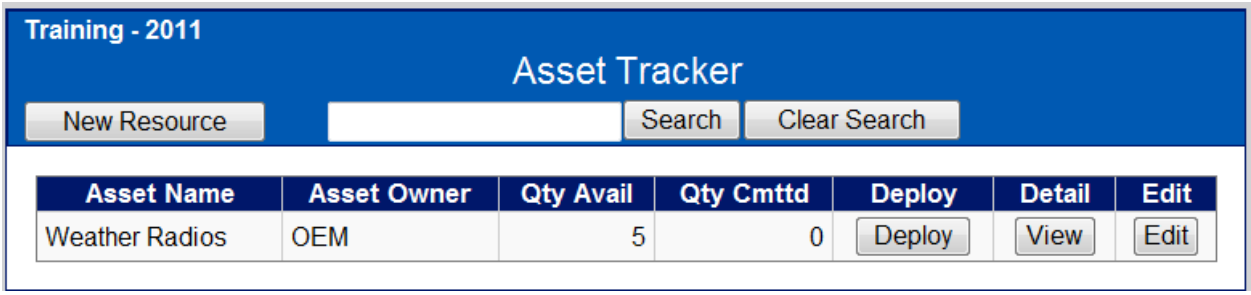
Supported Specialty WebEOC Boards

Asset Tracking Board (Version 1.0 – 1.01) *Incident Based*

Description: The Asset Tracking board records assets and their ownership information and tracks deployment data associated with the asset.

Views: This board offers a list view and an input/edit view for recording asset information. This board also provides an entry/edit view for deploying the resources or reviewing deployment history.

List View - This view lists all recorded assets for the active incident.

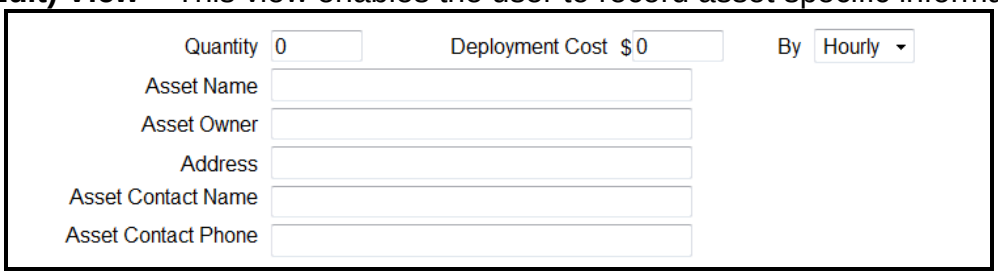


Default Features:

- *Search* capability on the Asset Name field for a specified value
- Sort capability on the Asset Name and Asset Owner fields by clicking on the corresponding column header/field title.
- New record creation by clicking the *New Resource* button
- Record editing through the *Edit* button
- Deployment capability through the *Deploy* button
- *View* button to see additional details for the corresponding asset.

Variations: Prince George's County renamed the Asset Name to Resource Name and the Asset Owner field to Agency.

Input (Edit) View – This view enables the user to record asset specific information.



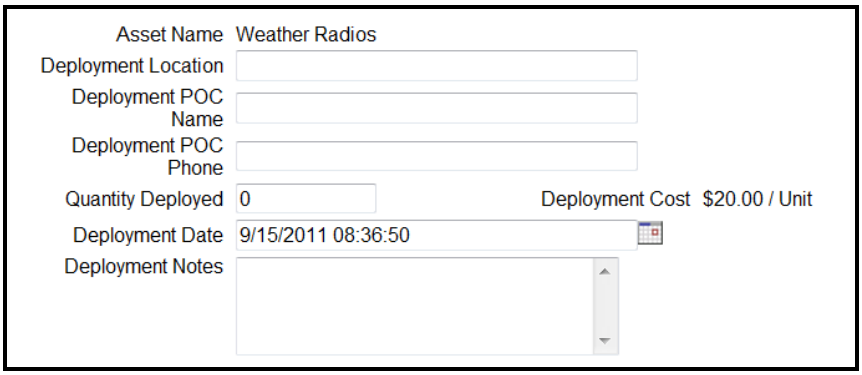
Default Features:

- Drop down lists to maintain data consistency
- *Spell Check* button to ensure correct spelling

Variations: Prince George's County renamed the Asset name field to Resource Name; added a field (dropdown list) to capture the Resource Type; renamed the Asset Owner field to Agency; renamed Address to Location Name, Street, City, Zip; renamed Asset Contact Name to Deployment POC; renamed Asset Contact Phone to POC Phone; and added a deployment comments field.

Supported Specialty WebEOC Boards

Deployment View – This view enables the user to record the deployment details for an asset.

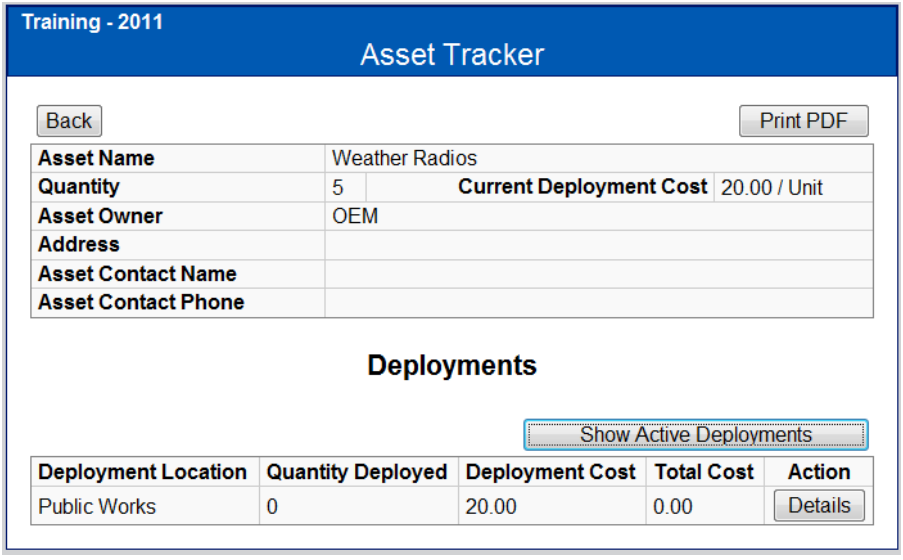


Default Features

- Date/Time picker code to facilitate proper date format.
- *Spell Check* button to ensure correct spelling
- Notes field for additional information

Variations: Prince George's County renamed the Asset Name field to Resource Name.

Details View - This view shows the asset information and the ability to toggle between displaying all deployments related to the asset or all the active deployments related to the asset.



Default Features:

- *Print to PDF* option to display a report of the asset information for printing.
- Filter button to display either All Deployments or display Active Deployments related to the asset.
- *Details* button to view additional information on the deployment record.

Variations: Prince George's County renamed the Asset Name field to Resource Name; Asset Owner to Agency; Address to Location Name,
