

Supported Specialty WebEOC Boards

Calendar Board	(Version 1.0)	Incident Independent
<p>Description: This board captures events, training, drills, etc. This board is available as a replacement to the discontinued WebEOC Calendar plug-in.</p>		
<p>Views: This board provides a calendar view and a list of calendar events accessible through the calendar view.</p>		
<p>List View – This view lists the calendar view. The view can be modified to display by day, week, work week, month, or year.</p>		
		
<p>Default Features</p> <ul style="list-style-type: none"> • <i>Add Event</i> button to create calendar events and specify the type of event. • <i>Edit Event</i> button to view/edit an existing calendar event • View options to change the display from a full month to a particular day, week, work week or year. • Buttons to switch to either the previous or next month. • Color coded text that reflects the type of event 		
<p>Variation 1: The NCR Fusion Calendar provides for filters on the type of calendar entry and the Category. There are multiple lists views that display all calendar items but can only input and edit their specific category. They are NIMS, Regional Planners, and Training and Exercise. The Emergency Manager view can add and edit all entries. Additionally there is a legend feature in the upper left corner to indicate what the various colors represent on the calendar.</p>		

Supported Specialty WebEOC Boards

Variation 2: DC’s Emergency Management Agency’s Watch Operations uses a version of the calendar to track activities. This calendar is color coded by the event type (Coop Test, EOC Activations, Hyperthermia, Hypothermia, EAS Alerts, Exercises, Special Events, Parade, Festival, Demonstrations, Course/School). In addition the entries track the category of the events so the calendar view can be filtered to only show a particular category.

Variation 3: DC’s Emergency Management Agency uses a version of the calendar to track staff. This calendar is color coded by the work status (Duty, Annual Leave, Sick Leave and Training). In addition the entries track the shift so the calendar view can be filtered to only show a particular shift.

Input View – This view captures a calendar event.

The screenshot shows a web form for creating a calendar event. The fields and controls are as follows:

- Report As:** A dropdown menu with "Joan E. Koss" selected.
- Originator:** A text input field containing "Joan E. Koss".
- Title/Subject:** A text input field with a "40 characters left" indicator.
- Start:** A date/time picker.
- End:** A date/time picker.
- Event Type:** A dropdown menu with "Meeting" selected.
- Location:** A text input field with "Get Address" and "Map It" buttons.
- Description:** A large text area with a vertical scrollbar.
- Attachment:** A text input field with a "Browse..." button.
- Remove Event:** A checkbox.
- Buttons:** "Save", "Cancel", and "Spell Check" buttons.

Default Features

- *Spell Check* button to ensure correct spelling
- Drop down lists to maintain data consistency
- Date/Time picker code to facilitate proper date format.
