

Supported Specialty WebEOC Boards

Email Board	(Version 1.0)	<i>Incident Independent</i>
--------------------	---------------	-----------------------------

Description: This board enables designated users to send email messages to a predefined list of recipients. The email recipient list is managed through a WebEOC view and not HTML.

Views: This board has two components – one to setup the email recipient list and the other to send emails.

Email Recipient View – This board is available to the administrator to setup the list of email recipients for emailing.

Default Features:

- Update button to modify the recipient list.

Variations: None

Update View – This view enables the administrator to modify the email list.

No Default Features

Supported Specialty WebEOC Boards

Variations: None

Email View – This view enables a designated user to send an email to the previously designated email recipients.

FFX - Training (2012)
