

# Supported Specialty WebEOC Boards

## Roads Tracking (Version 1.0) *Incident Independent*

**Description:** This board is used by multiple groups to record and share road impacting issues. The board includes areas to specify the quadrant, district, box and beat. In addition, it provides an area to indicate whether any utility companies were contacted. In addition based on areas to a series of questions it designates the priority of the road issue.

**Views:** This board offers two views: one for read only access and the other with full administrator privileges. A special view exists enabling archiving of a record.

**List View** - This view lists the roads and key high level details.
